**Protect
Your
Seed Corn**

During the period when it is most easily damaged, by ridding your crop of crows and other corn-pulling birds and animals. It saves loss of seed and labor of replanting. It positively will not clog any planter. It is non-poisonous and will not injure the seed or any kind of corn. It is more effective, more convenient to use, and more economical than any other material.

A field of O & M SEED OATS. Note the thick heavy stubble. O & M SEED OATS stool heavy and grow more oats with less seed per acre than the common Seed Oats

Our O & M Northern grown Swedish Type Seed Oats, testing 38 to 40 lb. per bu. have given the farmers the very best of results for many years. Increased yields and superior feeding quality. They are a very thick shuck oat, stiff straw and seldom lodge.
